Old Business:

- Review repeater status: Matthew reports 146.625 has a long/noisy squelch tail, Mike indicates they had noticed that when they previously worked on it. It comes and goes and they think it's general noise levels in the downtown area. If the levels gets too high, it holds the squelch open until the tone squelch kicks in. If we tighten the squelch, then it takes a much stronger signal to get in. He thinks the noise is also holding the tone decoder at first until it fully detects the loss of PL tone. It's sort of the reverse of the delay in key-up we experience with tone. In short, there isn't much we can do for it at this time.

New Business:

- Interference: Nothing to report this month
- Annual meeting with elections in January 26, 2026
 - Expiring Terms - Bob Burns, John Shouse, Matthew Brown
 - All indicating they will run again
- Next regular board meeting November 24 at Salvation Army EDS

Matthew Bechdol motioned to adjourn, John seconded, all agreed with no objections and the meeting ended at 7:10 pm
